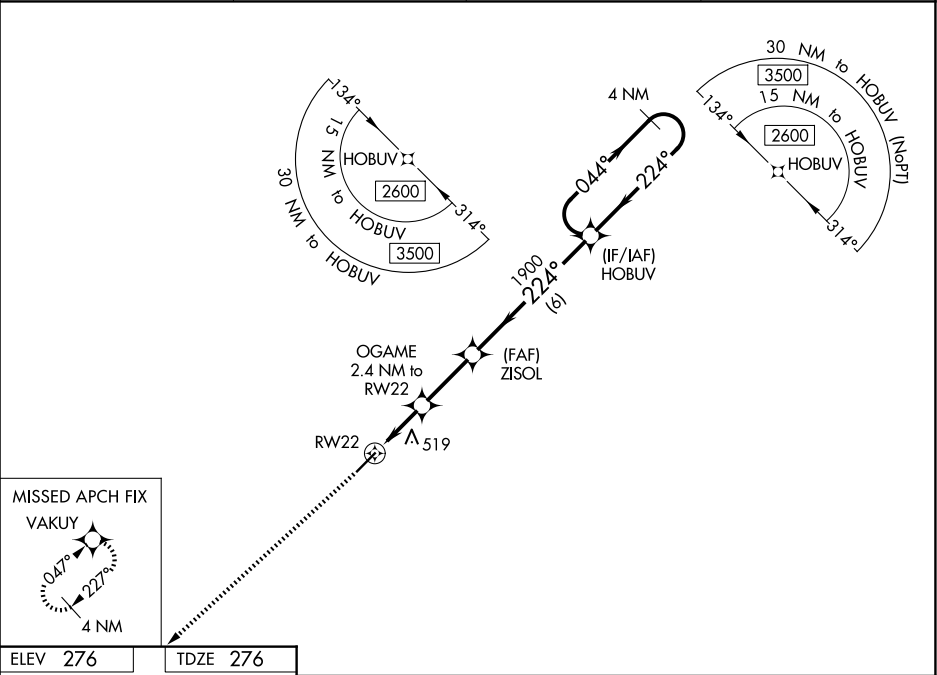

Diagram illustrating the approach procedure for Runway 22 (RW22). The diagram shows the runway layout, including Runway 4 and Runway 22, and the approach path. Key features include:

- Runway 22 (RW22) is the primary runway, with a length of 5500 x 100.
- The approach path is defined by a series of waypoints: 3000, VAKUY, OGAME, ZISOL, and HOBUV.
- The approach path is divided into segments: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of angles: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of distances: 2.4 NM, 2.6 NM, and 6 NM.
- The approach path is defined by a series of altitudes: 1080*, 1900, and 2600.
- The approach path is defined by a series of headings: 224°, 1080°, 1900, and 2600.
- The approach path is defined by a series of bearings: 224°, 1
